Sequence 3 – Eco-logic.

Friday, November 27th 2020.

CE :

1)The elements strikes in this photo are woman, indian, feuther, money.

2) The Woman is alone in cliff, stand up. Her attitude and clothes are : brave, quiet, utopian, selfichers.
3) The woman and the other elements in the photo symbolice low angle shot, caption, geometrical patterns.
4) Yes, because waste fish for earth to caught.
5) The Cree Indian prophecy evoke the ecological social of world. The importance of money according to the prophecy is founded money for earth.

Monday, November 30th 2020.

Correction Text :

1) The woman is a native american, she is standing on a rock, she is wearing a blanket and a feather. She is alone and she is looking at the horizon.
   She quiet and peaceful and mysterious and determined.
2) She is posing on the canyon. The wind blow her hair.
3) -The symbol are the traditional and the environment.
   -The European who came to colonize the country.
   -When the colonizers will find the money, they won't have and food to live. The woman seems to warm us, and the text under her is a warming to stop overconsumption.

Doc 3 :

This document is about poster with hastag #WorldEnvironmentDay. It explain to save the environment world. In the photo, they are the hand. IN the pictures, we can see the hand to shake hands with branch to save the earth and humanity. It posted in 2019. One leaf is up of branch.
The theme for 2019 is « Air pollution ». Every World Environment Day has a different host country where the official celebrations take place. The focus on the host country helps highlight the environmental challenges it faces and supports worldwide efforts to address them. This year's host in China.

Shake hands = serrer la main
Urge people = encourager les gens à
to save = sauver
preserve the Earth = sauvegarder la planète

A poster is a means of communication = una affiche et un moyen de communication
pieces of advice = des conseils

protect the planet = protéger la planète
climate = climat
this generation has to stand up = la génération doit se lever
he wants other schools to follow him = il veut que d'autres écoles suivent
plastic bags = sac en plastique
thansands of Trees =
the power of each person =le pouvoir de chaque personne

Written Mark n°1 :
The first two photos are of various young people who are respectively planting trees and cleaning up trash on a beach.

The poster shows a human hand shaking hands with the leaves of a tree branch. This poster was created to celebrate World Environment Day. The common elements which compose the 3 documents tend to urge us to be respectful with nature and unite with it as well.

All in all, the three photos communicate their point well because they draw our attention towards our relationship with nature and highlight the importance of ecological gestures and actions.

Thus, this chapter may deal with the preservation and protection of the Earth.

EE p°45 :
The Daily News show that every where of earth nature suffer of Human Activity.
For example : many forest fire in Australia, Amazonia, California, are consequences of global warming. There is some much plastic in the oceans that it represents Surface of Continent : the 7th continent.
Many animals die with this plstic, even in islands where with not human presents. Some birds die eating a pieces of plastic. They found in the water.
The Mondial Population grows up and ressources decreases.
We have to find solutions to save these ressources to let a bearable world for the future generation.

Written Mark n°2 :
This poster displays a list of specific pieces of advice that we should apply to our daily habits in order to preserve the planet. Therefore, it plays an educational role.

The speaker of the video is a teenage environmental activist who is at the head of Earth Guardians, an environmental organization.

He wants to stop the destruction of Planet Earth. He expects to address the issue of pesticides, the pollution brought by plastic bags and the dangers of fracking. Moreover, he worked with his county commissioners and his city council. Together, they put an end to the use of harmful pesticides in parks and implemented a fee on plastic bags. Then, they worked on a ban on fracking. He also educated people on ecological matters on a worldwide scale and made people plant trees. He claims we should unite and get involved in ecological causes to alter the bleak destiny of the planet.

Written Trace n°3 :

Xiuhtezcatl Martinez wants to stop the destruction of Planet Earth. He expects to address the issue of pesticides, the pollution brought by plastic bags and the dangers of fracking. Moreover, he worked with his county commissioners and his city council. Together, they put an end to the use of harmful pesticides in parks and implemented a fee on plastic bags. Then, they worked on a ban on fracking. He also educated people on ecological matters on a worldwide scale and made people plant trees. He claims we should unite and get involved in ecological causes to alter the bleak destiny of the planet.

Written Trace n°4 :

The photo shows Daryl Hannah, a renowned and good-looking Hollywood actress, with her hand covered in black crude oil standing in front of a background full of nature. Her gesture explicitly demonstrates that we should stop the use of oil products to preserve the natural world. Daryl Hannah embodies glamour and beauty and deliberately uses her image to convey a convincing ecological message. The contrast between her natural beauty and her hand covered in black crude oil speaks volumes about the fact that it is a harmful pollutant that ruins the beauty and the health of the planet.

There is a pollution in the ocean and earth. Fish can't live in the good condition. In the sky, there is every CO2 for children who live in the good health. The transport and factory pollute. The wind breath very strong. We must protect Earth and save the Planet and animals. Global warming to do melt a ice. It is a campain to fight against pollution.

_global warming
_organic
_factory
The Global warming is dangerous for the planet. The organic is a food to protect Earth. The Factory pollute on CO2.

Climate chang food calculator : What's your diet's carbono footprint ? - BBC.

Diet = régime alimentaire
to be on a short diet = être en régime

140 + 229 + 60 + 25 + 5 + 352 + 284 + 80 + 390 + 25 + 3 + 3 + 121 + 43 = 1760 kg

From the Climate change food calculator, I know my diet's carbon footprint today : 1760 kg.

Over an entire year, my consumption of food is contributing 1760 kg to my animal greenhouse gas emissions.

Avoiding = évitant (to avoid)
dairy products = produit laitier
plant based = végétarien
UN's Intergovernmental Panel on Climate Change (IPCC) = groupe
Wast's high consumption of meat = conosmmation viande
hugely = énormément
researchers = (to research = rechercher
lamb = agneau
damaging effect = effet dommageable
insulate homes isoler les maisons
video ocnferencing instead of business travel = conférences vidéo au lieu de faire des voyages d'affaires
amount of land = montant d'un pays
scale = échelle
regularly = régulièrement
Switching = permutter
deforested = déboiser

low-impact = bas-impact
average = moyenne
originating = originellement
heated = réchauffer heat = chaleur
friendly = amicalement
to assess = établir
packaging = emballage
cooking process = méthode de cuisson
retailers = détaillant
sizes = taille
British Dietic Association (BDA) = Association Britannique des régimes alimentaires
Committee on Climate Change = Comite sur le changement de climat

lifecycle = le cycle de vie
Carbon Neutral calculator =
calculateur

Monday, January 4th 2021.

_Walk more
_turn off the lights, xater
_cycle instead of drive
_take a shower instead of a bath
_recycle, compost
_Chean the beach, the ocean
_reduce your carbon footprint / CO2 emissions
_eat less meat, have a balance diet.

1. Find the source of the document
2. Describe it to your classmate so he/she can draw it.
3. Explain why many animals are becoming « homeless ».
4. Comment on solutions

3. Many animals are becoming « homeless » because there natural habitat is destroyed by human activity : destruction of forest, destruction of submarines world by pollution. The animals are less home and food. For example : this bear lives usually on the ice floe, and this ice floe melt because climate change. This bear has nowhere to go.
4. To stp this problem, we have to remind about the ways to limit destruction to compensate for what we take in nature, and to remove everything useless.

In the middle, we can see a polar bear. We can see a filthy street with derelict bulding, It's seem sad and homeless. The polar bear is leaning on the wall. The bear has nowhere to go. The colours of the poster are sad creating filthy atmosphere. We can see many green bins. On the poster, it's written « You can help ». There are tags on the wall. WWF lauches a campaign to convince people to commit to using hybrid or fuel efficient cars to protect the planet.

Questions Graph p°64-65.

1. There is a great connection between food we eat and climate change. Indeed, some food produce a lot of carbon, as beef or chesse. But, foot and vegetables produce the carbon. And so, it's better to eat them and to eat rice.
2. Eating meat is a problem because the big production of carbon : 26,6k of carbon for 1k of beef.

Questions Podcast p°64-65.

1. Dairies the connection between the food we eat and climate change for

to the reasons. First, the condition of production of food like beef or cheese. Secondly, the condition of train transportation by plan or by truck when this food come from far countries.

2. Every day we can change our habits and, for example, it's foot and vegetables.

Ex n°1 p°67 Gramarry.

a. In August 2018, a 6.9 magnitude earthquake hit Lombok island, Indonesia.
b. To be more eco-friendly, Sweden has promised to reduce 40% of its carbon emission .
c. Many countries such as Costa Rica and Iceland have developed renewable energies to delay climate change.
d. Fashion pollutes water. That's why a lot of people have started to donate their clothes, and fashion designers are developing an interest in sustainable fashion.
e. Deforestation in the Amazon has decreased biodiversity.
f. We need to reduce our carbon footprint to prevent global warming from happening so fast.
g. When I go to a restaurant, I choose fish instead of meat.

Listen to the podcast

2) We can buy on cook less food Buy local ans fresh.
The production of chicken, beef and cheese produces more CO2 than cars.

Le comparatif :

- Adjectif une syllabe : radical + « en » … than...
Ex : big => bigger

*Adjectif : 2 syllabes ou plus : more …. than …
(exepté les mots de 2 syllabes finissent par « y ». Ex : happy => happiest

CO : An Inconvenient Truth trailer.

This film was made in 2005, by Al Gore, who wanted to be President of the U.S.A.
He says that a scientific consensers explains global warmthon earth by human activities.
He gives several example : no more snow in Patagonia, or on Kilimandjano, in Tanjania. This situation is a political issue but also a moral issue.
Temperatures increasing create storms all over the world.
But, many other threats exist : for example, the level of seas will be higher and many cities (New York, Calcutta, Shangaï) we be underwater. Thundred

millions of refuges will lost their house.
So, we have to eat together to avoid this future.
